**Disclaimer:** All records in the Price County Surveyor Office are available to the public, but it should be understood that for various reasons all of the data cannot be accepted at face value. The 1847-1866 original Federal survey notes include dimensions which have been found to be extremely approximate. Like hundreds of feet off. Early 1900's surveys by the county surveyors were more precise but were frequently subject to blunders. Since 1970, state law has required every licensed private surveyor to file with the county surveyor a copy of a map of every survey, but the data shown on these newer surveys can also contain inaccuracies or blunders, and the liability of surveyors is limited to their clients. Aside from clients, others requiring determination of boundaries, including adjoining land owners, are advised to hire a surveyor to make independent measurements to arrive at independent conclusions.

**Warning:** Cursed be he that removeth his neighbour's landmark. And all the people shall say, Amen. Deuteronomy 27: 17
