Re: Musser Flowage – Musser Dam Temporary Drawdown

Aquatic invasive species control water level reduction is scheduled to begin Tuesday, September 2, 2025, on the Musser Flowage. Weather pending, Musser Flowage will be drawn down 5 feet by Monday, September 15, 2025, drawdown rates should not exceed 6 inches per 24 hours. Minimum low flow compliance must be passed at all times including during drawdown and refill, discharge 66-75% of inflow (10 CFS) to ensure adequate flow downstream of the dam is maintained. This temporary drawdown is done to control aquatic invasives. Refilling to occur when ice-out conditions exist.

If you have any questions or concerns, please don't hesitate to contact me at 715-492-4459 or contact the Highway Department's main office at 715-339-3081 ext. 5.

Thank you

David Kempen
